

Digital, Experiential, And Intelligent Solutions For The Public Sector

Interactive Messaging Screens

Why it matters for your organization

- **Enhance Communication.** Share important information in real time and ensure no visitor misses out on what's happening.
- **Simplify Access.** Make it easy for people to access the resources they need, when they need them.
- **Maximize Flexibility.** Use one screen to handle multiple tasks and adapt to your organization's changing needs.
- **Boost Impact with AI-Powered Content.** Integrate AI-driven media and dynamic updates to elevate communication effectiveness across all messaging interfaces.

Solution in action

- ✓ **Live Information Feeds** display essential real-time updates on everything that matters — from weather and traffic to upcoming events, meetings, and announcements.
- ✓ **Highlights of People and Organization Events** feature department heads, recognize outstanding employees, and showcase current organizational news.
- ✓ **Instructions and Document Access** allow visitors to quickly search for required forms and view “How Do I..?” instructions directly from the kiosk — reducing wait times and easing administrative workflows.
- ✓ **Flexible Multi-Application Screens** enable seamless switching between applications — from announcements and calendars to recognition boards and more — all on a single device.

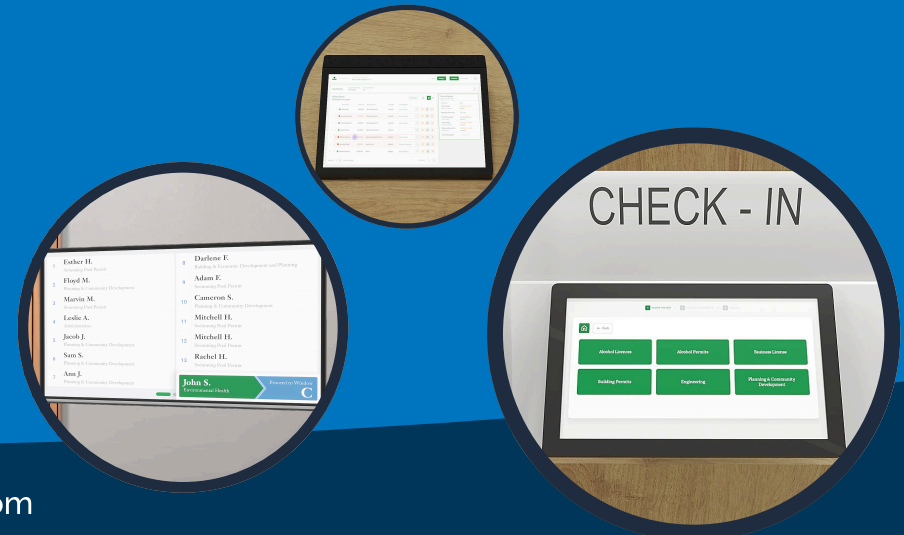

Queue Management System

Why it matters for your organization

- **Streamline Visitor Flow.** Eliminate manual registration bottlenecks and optimize service queues across departments.
- **Enhance Visitor Experience.** Keep your guests informed and stress-free with real-time broadcasts, SMS/email notifications, and clear directions.
- **Smarter Tools, Better Service.** Equip employees with Queue Control Pads to serve visitors efficiently, while managers track performance by employee and department.
- **Use AI-Driven Interfaces.** Enhance interfaces with AI to deliver personalized content and intuitive interactions that boost visitor engagement.

Solution in action

- ✓ **Queue Registration Kiosk** enables visitors to independently register for service, select the required department, and receive clear wayfinding directions to the service window — all without staff assistance.
- ✓ **Real-Time Queue Broadcasts** inform visitors of their position in queue and display a notification when it's time to approach the service window.
- ✓ **Queue Control Pads** empower staff to manage visitor flow, call the next person, and track service efficiency using integrated analytics tools.
- ✓ **Queue Management Server** connects all the devices above into a seamless network, synchronizing queue data across departments and service windows.

Smart Meeting Scheduling & Agenda Display

Why it matters for your organization

- **Simplify Meeting Planning.** View real-time room availability and daily schedules to book meeting spaces without conflicts and notify all participants instantly.
- **Centralize Meeting Info.** Smart calendar integration and automatic invitations ensure that everyone is informed on time and ready to attend.
- **Streamline Information Sharing.** Key agendas, project updates, and public notices are displayed in one accessible location to keep staff and visitors informed.
- **Ensure Inclusivity.** ADA-friendly design for live agenda makes content accessible and readable for everyone.

Solution in action

- ✓ **Meeting Room Scheduling & Booking** helps teams check the daily schedule and real-time room availability, making it easy to plan meetings at the right time or instantly reserve rooms on-site.
- ✓ **Automatic Email Invitation & Calendar Integration** automatically sends email invitations to participants and adds meetings to both personal and platform calendars.
- ✓ **Agenda & Public Notices Display** presents committee notices, project updates, and documents on a large screen, with the option to display content for a week in advance.
- ✓ **Accessibility & Smooth Navigation** offers ADA mode for accessible viewing and smooth scrolling for easy navigation through multi-page documents.

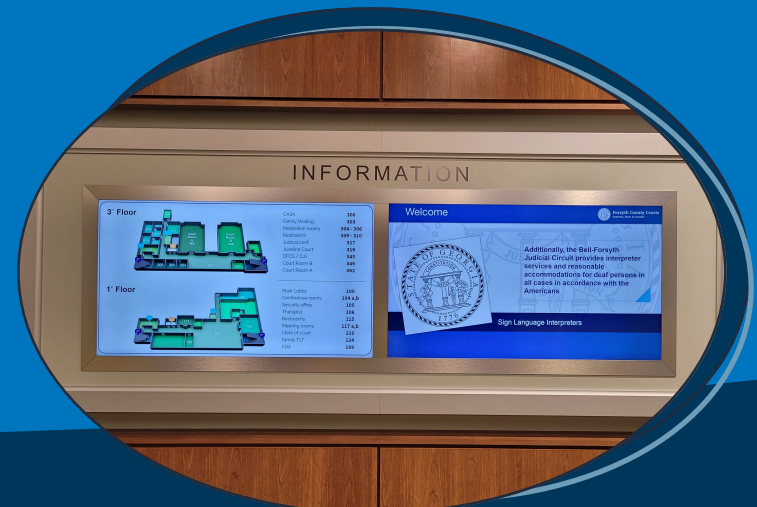

Indoor Wayfinding and Directories

Why it matters for your organization

- **Simplify Complex Navigation.** Help people move confidently and independently through your buildings, no matter the size or complexity.
- **Reduce Staff Workload.** Free up reception and security teams from answering repetitive directional questions and allow them to focus on more critical tasks.
- **Deliver Relevant Information.** Use every kiosk as both a navigation guide and a real-time communication channel for alerts and updates.
- **Maximize Device Value.** Combine wayfinding, announcements, and other services on one intuitive interface with AI-powered media—saving space and resources.

Solution in action

- ✓ **AI-Powered Interactive Maps** can be generated from existing floor and building plans or created from scratch to help visitors find rooms and offices without staff assistance.
- ✓ **Dynamic Route Planning** enables users to calculate the most convenient path from their current location to their chosen destination.
- ✓ **Real-Time Information Applications** display additional details such as announcements, weather, or traffic updates alongside navigation tools.
- ✓ **Multi-Application Integration** allows combining wayfinding with other digital services on the same kiosk for maximum functionality.

Digital Court Docket

Why it matters for your organization

- **Improve Public Transparency.** Display accurate, real-time court schedules to help visitors and legal teams stay fully informed about all hearings and locations.
- **Support Smooth Case Flow.** Guide all attendees — from defendants to legal staff — to the correct rooms, ensuring punctuality and smoother proceedings.
- **Free Up Administrative Resources.** Minimize the time your clerks and front desk staff spend answering schedule questions or guiding visitors.
- **Enhance Court Efficiency and User Experience.** Ensure all participants stay updated with minimal effort, reducing disruptions and delays in court operations.

Solution in action

- ✓ **Real-Time Court Schedule** shows ongoing and upcoming court hearings with case numbers, defendants, judges, and assigned rooms.
- ✓ **Live Updates** keep attendees and visitors informed of any schedule adjustments or location changes.
- ✓ **Visitor Reminders** display essential messages directly on the court docket screen, such as guidance on courtroom etiquette.
- ✓ **Auto-Rotating Display** cycles through all scheduled hearings if the list exceeds screen capacity — ensuring nothing is missed.

Smart Navigation And Engagement Tools For Public Environments

Outdoor Wayfinding & Location Explorer

Why it matters for your organization

- **Highlight Attractions and Amenities.** Encourage visitors to discover nearby points of interest, boosting engagement and promoting local businesses.
- **Reduce Staff Load.** Assist new visitors or tourists in navigating large spaces without the need for printed maps or staff guidance.
- **Keep Visitors Informed.** Deliver layered content like wayfinding, events, promotions, and local updates — with AI improving the clarity, relevance, and presentation of information.

Solution in action

- ✓ **AI-Generated Outdoor Maps** transform existing plans into intelligent visual guides for parks, trails, and outdoor areas—with AI refining paths, optimizing highlights, and improving navigation for effortless exploration.
- ✓ **On-Tap Location Information** offers instant access to interesting facts about location, directions, and multimedia content about specific attractions or service areas.
- ✓ **Nearest Points of Interest** presents users with dynamic suggestions of nearby attractions, food courts, gift shops, and other local highlights based on their real-time location.
- ✓ **Multi-App Integration** allows combining navigation, announcements, promotions, weather conditions, traffic, and other information on one screen for outdoor visitors.

Smart Technologies

For Public Museums & Cultural Spaces

Solution in action

- ✓ **Event Calendar & Announcements** keep visitors informed about upcoming activities, increasing foot traffic throughout the center.
- ✓ **Recognition Walls** showcase notable figures or other featured items with brief stories, offering visitors visual storytelling.
- ✓ **AI-Enhanced Animated Story Walls** provide an interactive experience for exploring key topics, enhanced with AI-generated media and supporting text.
- ✓ **Multi-App Display Support** consolidates multiple experiences onto a single device, enabling transitions between applications with a simple touch.

Digital Discovery Center

Why it matters for your organization

- **Deepen Visitor Engagement.** Keep guests informed about upcoming events and announcements to encourage repeat visits and sustained engagement.
- **Celebrate Notable Figures.** Share your history, showcase key individuals or objects with visual profiles and concise stories.
- **Support Educational Outreach.** Engage visitors with images, sounds, and media, carefully enhanced and adapted by AI to enrich storytelling and improve the learning experience.
- **Reduce Hardware Costs.** Consolidate applications onto one device, enabling quick access to diverse content while saving space and money.

Storytelling projections

Why it matters for your organization

- **Bring History to Life.** Help visitors explore complex stories through vivid, multi-sensory experiences, with AI enhancing content — animating historical photos, generating voices, and crafting authentic dialogues.
- **Offer Personalized Learning.** Let each guest choose what to see and hear via the self-service exhibit kiosk, fostering autonomy and curiosity.
- **Refresh Exhibit Appeal.** Give static installations new life through visual storytelling and ambient sound.
- **Improve Educational Value.** Present complex historical narratives in an accessible and visual manner, supported by AI-powered narrators that adapt stories for clarity and engagement.

Solution in action

- ✓ **Self-Service Exhibit Kiosks** allow visitors to explore photos, videos, and stories, enriched by an AI-powered virtual guide narrating the history behind each display at their own pace.
- ✓ **AI-Infused Immersive Video Mapping** brings history to life with projections that highlight notable figures and events, turning ordinary spaces into dynamic, AI-powered storytelling canvases.
- ✓ **Synchronized Audio Narration** enriches visual projections with professional voiceovers, background soundscapes, and historical dialogues.
- ✓ **All-in-one [Ei] Platform** equips museums, libraries, exhibitions, and event venues with tools to engage, inform, and inspire visitors through interactive content and flexible display solutions.
